

SNAPSHOT PROFILE

Senior Frontend Engineer with 7.8 years of experience building high-performance, accessible, and scalable web applications. Proficient in JavaScript, React.js, TypeScript, Next.js, React Native, and modern UI frameworks, with a strong focus on performance optimisation, accessibility (WCAG), and intuitive user experiences. Passionate about AI-driven UI solutions, micro frontends, and cross-functional collaboration to deliver seamless, user-centric products. Adept at enhancing UI architecture, reducing load times, and integrating cutting-edge technologies for improved engagement and efficiency.

TECHNICAL EXPERTISE

- **Languages:** JavaScript(ES6+),TypeScript and a Basic understanding of Java - Spring Boot
- **Frameworks and Libraries:** React, React Native, Redux, Angular, VueJS, NextJS, Spring Boot, gRPC, REST API integration, Microservices, WordPress, Prismic
- **UI Development:** HTML, CSS3, TailwindCSS, Bootstrap, Material Design, UI patterns, Web Accessibility, SCSS
- **Design & Architecture:** Event-Driven Architecture, MVP, Micro Front-ends
- **Accessibility:** WCAG
- **Visual Design:** Typography, Color Theory, Layout
- **Performance:** Profiling, Rendering Optimisation, Core Web Vitals
- **Environment:** Windows, MacOS
- **Cloud Technology:** AWS, Azure, Vercel
- Basic understanding of **Adobe Experience Manager (AEM)** concepts, including **authoring, template setup, and component customisation.**

WORK AND KEY STRENGTHS BENCHMARKS

- **Frontend Development Excellence:** Played a pivotal role in developing various frontend modules at **Slickbit Technologies**, enhancing **development efficiency** and improving **user satisfaction**.
- **User-Centric Design:** Passionate about **creating seamless, accessible user experiences** across devices, ensuring compliance with **WCAG standards**.
- **Performance Optimisation:** Implemented **responsive UI patterns and best practices**, leading to a **30% reduction in load time** and increased **user engagement**.
- **Innovation & Technology Adoption:** Proactively seeks out **new technologies** and best practices to improve **development processes**, ensuring cutting-edge **UI solutions**.
- **Agile & Process Efficiency:** Adopted and promoted **Agile methodologies**, leading to **improved data processes, faster application performance, and streamlined workflows**.

PROFESSIONAL DEGREES & ACCREDITATIONS

- Sri Nagarjuna Degree College (**BCA**) – March 2019
- Sri Chaitanya JR College (**MPC**) – July 2016
- Andhra High School (**SSC**) – April 2013

CORE AREAS OF EXPERTISE

- UI & Design
- JavaScript Frameworks
- Test-driven Development
- Project Planning & Execution
- Team Building
- Cross-functional Collaboration
- Model-View-Controller (MVC)
- Problem-solving
- Agile Methodologies
- AI/ML Integration
- Technical Leadership

Technology and Innovation Enthusiast, excels in both startup environments and large-scale enterprises, bringing a dynamic creativity and a proactive ‘**can-do**’ attitude. Demonstrated excellence in driving innovative solutions and delivering impactful UI development to create seamless user experiences.

Frontend Engineering innovator, adept at creating exceptional user experiences in both startup and enterprise environments. My passion lies in crafting high-performance, responsive, and accessible web applications using cutting-edge technologies like ReactJS, TypeScript, and NextJS.

Valued Business Partner: Effectively influences individuals, organisations, technologies, and industry with proven leadership, facilitating seamless collaboration across cross-functional teams. Ensured efficient communication and successful project outcomes through strong technical and business acumen.

Turing global Pvt Ltd, Hyderabad, India

Senior Software Engineer | Sept 2025 – Present

Client: **Pepsico** (Sept 2025 – Present)

GSAT (Global Seed Allocation Tool): Enterprise agricultural supply chain platform for **PepsiCo** managing global potato seed allocation, multi-tier pricing strategies, and demand forecasting across international programs. Built with React 18, Redux Toolkit, Material UI, and PepsiCo's internal design system, featuring complex data-driven tables, real-time validation, and Okta-secured role-based access.

- Developed dynamic and **data-intensive** UI components using **React.js**, **Material UI**, and PepsiCo Design System for a global agricultural supply chain platform managing seed allocation and pricing across international programs
- **Implemented complex pricing workflows** with multi-tier rate calculations (Monthly/Flat Rate), size-based splits, real-time validation, and copy/distribute functionality across 14+ interconnected modules
- Collaborated with the **ProArch(UK)** team to investigate and resolve production issues, ensuring seamless operations
- Integrated **RESTful APIs** using **Axios** with **custom hooks** (useApiRequest), **error handling interceptors**, and data transformation pipelines to manage cascading filters and dynamic form submissions

Caprus IT Pvt Ltd, Hyderabad, India

Software Engineer | May 2025 – Aug 2025

Client: **ProArch** (May 2025 – Present)

Chummy Funding: Chummy Funding is a comprehensive **construction logistics platform** that **connects hauliers and drivers** with job sites, managing the entire workflow from **dispatch through delivery completion**. It features a web portal for site owners, project managers, and administrators to create jobs, track progress, and oversee invoicing, as well as a **mobile app for drivers to accept assignments**, navigate sites, and record deliveries. Integrated financial services, including automated invoice generation, payment processing, and Chummy Funding's proprietary CF Status financing, streamline cash flow for construction projects.

- Developed interactive and **responsive UI components** using **React.js** and **Material UI**
- Built cross-platform mobile applications for **iOS** and **Android** using **React Native**
- Collaborated with the **ProArch(UK)** team to investigate and resolve production issues, ensuring seamless operations
- Actively participated in **sprint planning** and **bug prioritisation** to align with business requirements
- Integrated **external APIs** using **Axios**, implementing custom instances and interceptors for optimised data handling

Slickbit Technologies, Hyderabad, India

Software Engineer | July 2022 - May 2025

Project 1:- Flow.ai – AI-Powered Inventory Management

Flow.ai is an intelligent inventory management system that minimises manual input through **AI-powered automation**. It streamlines invoice digitization, simplifies inventory counting via **image recognition**, and generates actionable insights to optimize business decisions.

- Developed interactive UI components using React.js and enhanced user experience with Material UI.
- Built cross-platform mobile applications for iOS and Android using React Native.
- Integrated AI-powered invoice digitisation and inventory recognition for automated data processing.
- Implemented custom API handling with Axios, leveraging interceptors for optimised data retrieval.
- Collaborated with cross-functional teams to debug and resolve production issues, ensuring system stability.

Project 2:- Moneris Go Appetit (MGA)

Moneris Go Appetit (MGA) is a comprehensive cross-platform application (iOS & Android) designed to streamline restaurant operations. Contributed to the development of three key modules using **React Native**:

Tablet App – This module enables users to create menu items, manage takeout and dine-in orders, and track order statuses via the Kitchen Display System (KDS).

KDS App – Provides real-time order status updates and efficient order management.

POS App – Facilitates seamless order placement and payment processing.

- Developed interactive and reusable **UI components** using **JavaScript** and **React Native**.
- Built cross-platform mobile applications, ensuring smooth performance on both **iOS and Android**.
- Integrated external **APIs** using **Axios** with custom instances and interceptors for optimised data handling.

- Collaborated closely with the **Moneris team (Canada)** to investigate and resolve production issues efficiently.
- Provided dedicated development support to **Slickbit QA** and **Moneris QA**, contributing to system stability and product quality.

Trangla, Hyderabad, India

Frontend Engineer | Jan 2019 – July 2022

Client : Turpy mobile apps (Jan 2019 – July 2022)

PlayAt – Sports Ground/Court Booking App: PlayAt is a sports ground booking app designed for sports enthusiasts in Hyderabad. It enables users to discover nearby sports facilities, instantly book available slots, and receive notifications about upcoming events at sports arenas.

- Developed and integrated the web UI into the ReactJS application.
- Collaborated with the team to design, build, and maintain reusable front-end components using **HTML, CSS, JavaScript, and ReactJS**.
- Worked closely with back-end developers to implement seamless UI integration.
- Assisted the design team in creating promotional banners for clients.
- Collaborated with WordPress developers to build websites using **Beaver Builder** and **Elementor**.
